

# VIGILANCE IS EVERYONE'S RESPONSIBILITY

01

## Vigilance as a Responsibility

- ▶ RACAs are on the front line of air cargo security and must remain vigilant in identifying, reporting, and preventing security risks.
- ▶ Vigilance is not just about following procedures but being proactive in safeguarding the system.

02

## Adapting to Changes in the Threat Environment

- ▶ RACAs need to stay informed about trends in security and adapt to new challenges by proactively adjusting their practices to stay ahead of emerging threats by keeping security culture front of mind and always maintaining vigilance throughout their operation.

03

## The Importance of a Strong Security Culture

- ▶ Security is a collective, ongoing commitment from RACAs that is embedded in the workplace culture, not just a set of rules.
- ▶ RACAs play a key role in creating a security-first environment that helps protect air cargo systems.

04

## Everyone's Responsibility

- ▶ Security is a shared responsibility, from leadership to frontline staff.
- ▶ RACAs should foster a sense of shared responsibility, ensuring that everyone understands their role in safeguarding the air cargo supply chain.

05

## Prompt Reporting and Information Sharing

- ▶ RACAs should promote the "Hear it, See it, Report it" mantra, encouraging RACAs to report suspicious activities or security incidents.
- ▶ Sharing valuable information through timely reporting can help identify larger security threats and mitigate risks at an early stage.

06

### Security Awareness Training

- ▶ RACAs must provide regular thorough training for all staff, especially those engaged in security control functions.

07

### Partnership in Global Security Efforts

- ▶ RACAs play a key role as partners in the global response against acts of unlawful interference in aviation, their actions play a significant part in the broader security ecosystem.

08

### Mitigating Insider Threats

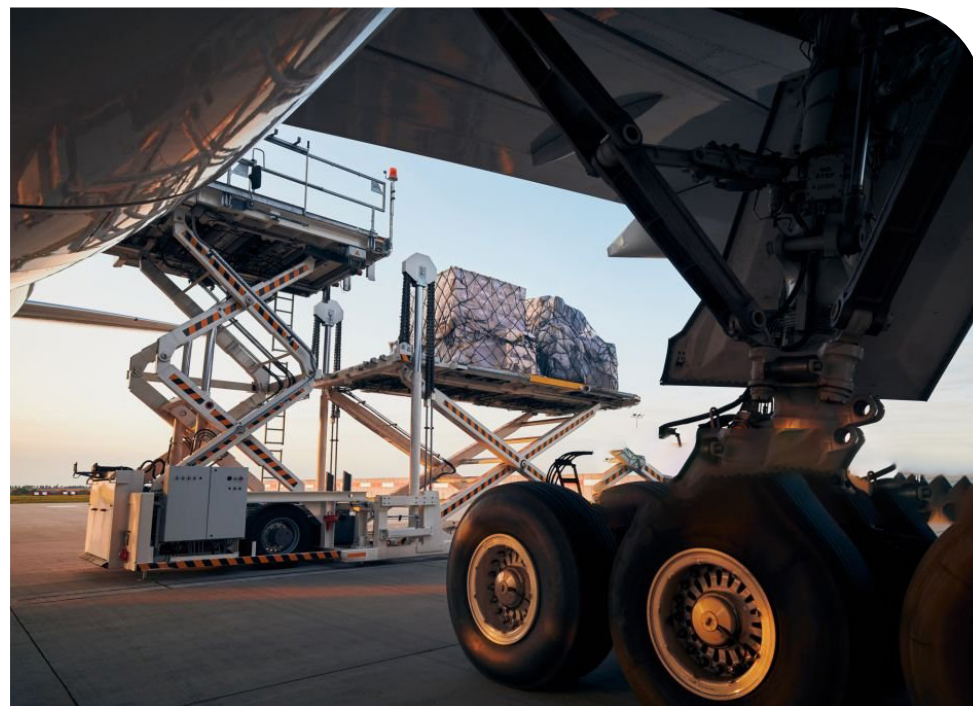

- ▶ RACAs must ensure their facilities are secure, establish robust procedures, and maintain ongoing vigilance to effectively mitigate potential insider threats.
- ▶ RACAs are encouraged to play an active role in identifying and preventing bad actors within the system, reinforcing the need for a strong, well-informed workforce.

09

### Fostering a Security Culture

- ▶ RACAs should always and continuously foster a security culture that encourages responsibility, awareness, and active participation from all members.
- ▶ Everyone must understand their role in protecting air cargo, and the culture should be one that encourages responsibility, awareness, and active participation in the security process.
