

## What EECA Is

---

EECA is a Crown agency whose purpose is to *mobilise New Zealanders to be world leaders in clean and clever energy use.*

It works to improve the energy efficiency of New Zealand homes and businesses, supports renewable energy uptake, and provides information, tools, and funding to help people and organisations reduce energy waste and emissions.

EECA's Work includes:

### 1. Funding & Grants

EECA offers a wide range of co-funding programmes to help businesses and households decarbonise. This includes:

- Warmer Kiwi Homes programme – grants covering 50–90% of insulation and heating for eligible homes
- Low Emissions Heavy Vehicle Fund – grants covering up to 25% of the purchase or conversion of zero/low-emissions heavy vehicles
- Programmes for industrial decarbonisation, energy audits, feasibility studies, and technology demonstration projects

### 2. Business Support

EECA provides:

- Energy management planning (co-funding up to 40% to help businesses reduce energy use)
- Sector-specific pathways for manufacturing, freight, commercial buildings, etc. to reduce emissions and improve efficiency
- Tools to help businesses measure emissions, similar to the Climate Action Toolbox approach of measuring before reducing

### 3. Transport Decarbonisation

EECA supports NZ's transition to cleaner transport through:

- Funding for electric and hydrogen vehicles, charging, vessels, and off-road machinery via historic Low Emission Transport Fund (LETF) programmes
- Ongoing Heavy Vehicle Fund for zero-emission trucks and conversions

#### **4. Home Energy Efficiency**

EECA helps households' lower energy bills and improve comfort via:

- Warmer Kiwi Homes programme (insulation + heat pumps) reaching thousands of NZ homes
- Guidance on heating, insulation, solar, and efficient appliances
